ENABLING CORPORATE PROFITABILITY AND PRODUCTIVITY

Companies today are clearly focused on driving top line growth. The challenge for most lies in the ability to easily and effectively share files, data and reports between systems to improve the overall effectiveness of supporting corporate divisions, colleagues, customers, suppliers and partners.

Common Corporate Challenges:

- o Automate workflows and processes needed to import data from an external feed / data source into an enterprise database.
- o Generate and distribute Excel reports and dashboards automatically for decisions makers, customers and partners.
- o Share data between corporate systems and communities to keep them in sync.
- o Integrate multiple databases (ERP, CRM, applications, data warehouse and web solutions, etc...) to work better together.
- o Eliminate the unwieldy manual, error-prone processes that consume considerable time, money and resources.
- o Reduce opportunity cost of lost / delayed time to market.

SoftWidgets Enterprise Integration Suite - Bridging The Corporate Divide

SoftWidgets Enterprise Integrations Suite (EIS) drives corporate excellence by enabling companies to dramatically reduce labor costs and compliance risks while concurrently increasing profitability and customer / partner satisfaction through integrating corporate systems.

SoftWidgets EIS Drives Real Business Value To:

- **Build** strong connections with corporate communities by bridging disconnected systems into a seamless workflow without modifying or replacing existing infrastructures.
- **Transform** change into opportunity by quickly adapting internal and external systems through integration to consistently meet new opportunities, changing industry and customer demands.
- **Streamline** inefficient processes and operations with reliable, repeatable, error-free automation.
- **Orchestrate** strategic initiatives throughout corporate communities with an automated, error-free solution for populating and distributing Excel spreadsheets and dashboards.
- **Enhance** existing infrastructures and legacy applications by enabling continuous communication with new and innovative solutions that drive your business.
- **Reduce** compliance risk and liability through automation, logging, monitoring and auditing for a higher quality of information assurance.

“Your Software is a must have tool for any organization with system integration or reporting needs where reliability, productivity and cost savings are of paramount importance”

-- Department of the Air Force
