Automatically Create Accurate and On-Time Excel Reports!

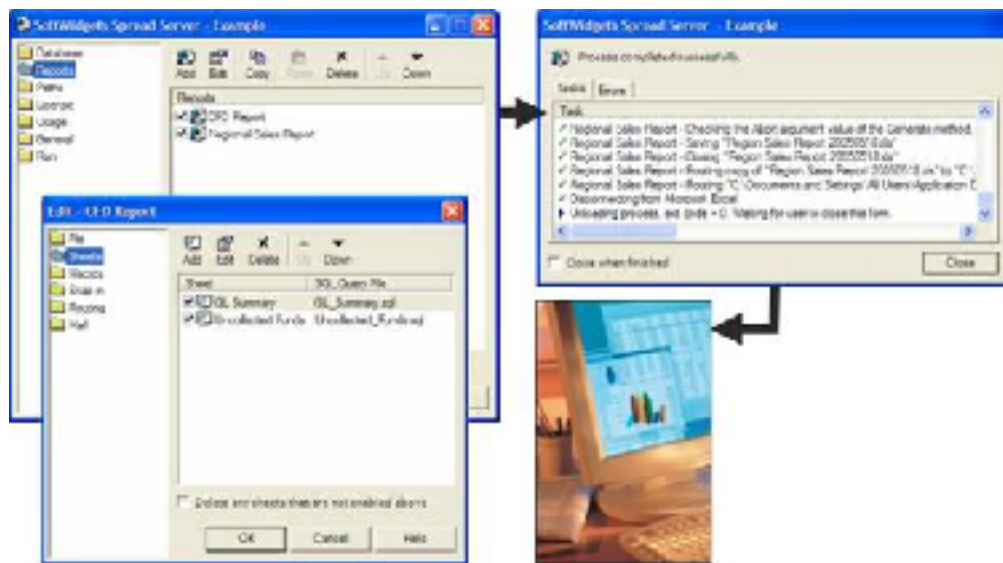

If you or your colleagues manually create and distribute Excel workbooks on a regular basis, then you need to give Spread Server a try!

Without a doubt, managing and automating routine Excel reports is a top priority for everyone. Companies today are heavily reliant on using the user-friendly and the cost-effective features of Excel. The problem is that companies are challenged with the higher cost associated with manually updating and formatting workbooks, experiencing potential problems with inaccurate entries or simply not getting their reports on time.

Spread Server runs on a server or workstation and was specifically designed to automate the creation and distribution of your EXISTING Excel reports. Spread Server utilizes all of your current workbooks, macro libraries and SQL statements to provide you and your colleagues with a higher level of automation, management, and auditing capabilities.

"Brilliant. This software allows us to produce consistent, professional reporting for our customers in a fraction of the time it used to take. It allows us to easily do the type of powerful Excel automation we always wanted!"

-- LeasePlan Ireland

"Oh...it's a beautiful thing....I just click a button and the data is sent to our clients straight from our database in a wonderfully formatted Excel file. I love it. Keep up the good work!"

-- Sampling Technologies

Wouldn't it be great to have the added comfort of knowing that your Excel workbooks are automatically created with accurate and up-to-date information?

With Spread Server, it is easy to automate and distribute your existing Excel workbooks to colleagues and partners, when they need them and how they need them.
